

DataFlex to New Heights

The Database Update Framework

Nils Svedmyr, RDC Tools International

The Database Update Framework (DUF)

- > Presentation two parts:
 - > What is currently released (July, 28 2017)
 - > 2.0 version (beta)

The Database Update Framework (DUF)

Code Sample (current version):

```
Object oApplication is a cApplication
End_Object

// Add DUF righth after the cApplication object:
Object oDbUpdateHandler is a cDbUpdateHandler
    Set Data_File_Field to File_Field DbVersion.DatabaseVersion
    Set piDbVersionFileSlotNumber to 1
    Set pbAutoCreateDbVersionTable to True

// Place a series of child objects to make database changes...
Object oDbUpdateVersion1_0 is a cDbUpdateVersion
    Set pnVersionNumber to 1.0
    Procedure OnUpdate
        Send ApiTableConvertALLToSql
    End_Procedure
End_Object
End_Object
```
