

NEXT STEPS

DYNAMIC AI

STATUS

- ❑ Initial pre-release Version 7 for early testers
- ❑ Monthly releases towards a final first production release
- ❑ Making the UI components (js, scss, css) available in source code for partners and licensed customers on GitHub
- ❑ Don't expect the same solid flow of functionality! (yet)

VERSION 6

- ❑ Windows 32 bit
- ❑ Windows ANSI whatever
- ❑ MS ADO (Oracle OLEDB)
- ❑ MS Access 97
- ❑ IIS – ASP depending
- ❑ HTML?
- ❑ Flash, Active X, JS (IE initially)
- ❑ Visual Basic
- ❑ Dedicated to single server session

VERSION 7

- ❑ Win 64 bit, Linux, MacOS
- ❑ “UNICODE” UTF-8
- ❑ Native drivers
- ❑ SQLite
- ❑ IIS + Apache, no dependencies
- ❑ HTML 5
- ❑ JS (for modern generation browsers)
- ❑ C++
- ❑ Authentication ticket

DEMO

WHAT DOES IT MEAN FOR YOU

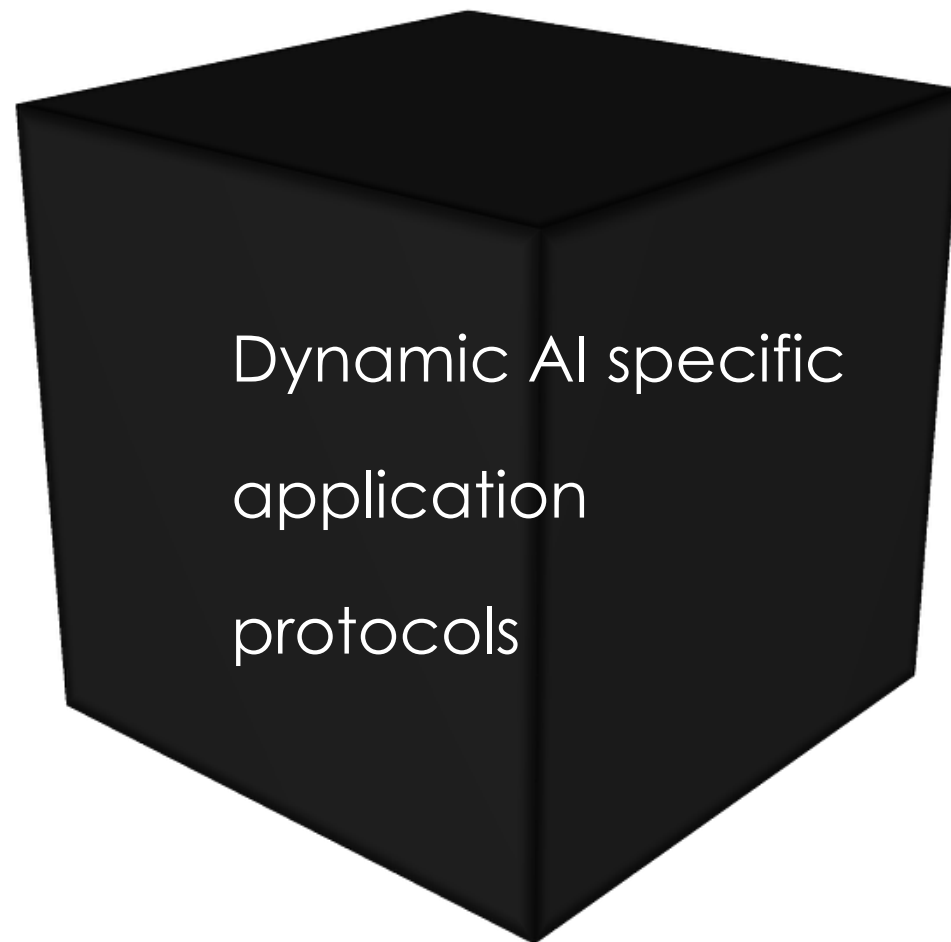

- ❑ The opportunity to select the platform to run DYNAMIC AI
(no longer only Windows, no longer specific IE features)
- ❑ More cost effective cloud hosting
- ❑ Request based load-balancing in Enterprise solutions
- ❑ Hot swappable servers
- ❑ Command line execution of reports, design, exports (no Internet server needed)
- ❑ Use DYNAMIC AI for any UNICODE supported language
- ❑ Support for native data types in e.g. MS SQL, Oracle
- ❑ Potential speed improvements from 64 bit native databases
- ❑ All databases client installations included in install

VERSION 7

- ❑ 4-5 years of developments * 3 developers
- ❑ 15000+ commits of code
- ❑ 1mio additions to code and approx 900k deletions
- ❑ A complete refactoring of the original application
- ❑ Use of best practice principles and patterns (SOLID, factory)
- ❑ Unit testing

DYNAMIC AI

DYNAMIC AI Version 6

DYNAMIC AI Version 7

WHAT DOES IT MEAN FOR YOU

- ❑ The opportunity to have full insights (eventually influence the master version of the UI code)
- ❑ Full transparency in debugging, testing etc. when extending DYNAMIC AI UI client side library with your own “types”, styles etc.
- ❑ The opportunity to integrate DYNAMIC AI content wherever you want
 - ❑ including drill-down
 - ❑ including design changes (ad-hoc or save)
- ❑ The opportunity to build applications that auto-generate DYNAMIC AI packages, reports, users, connections, data-sources, styles etc.
